PROFESSIONAL SUMMARY

Versatile IT operations and business systems professional with experience spanning enterprise technology, network operations, IT service management, and business process improvement. Serves in technical lead and subject matter expert capacities, coordinating workloads, investigating operational issues, developing procedures, and training team members. ServiceNow Certified System Administrator with a background in software development, workflow analysis, and business operations. Connects technical and business needs to develop practical solutions to complex problems.

TECHNICAL & PROFESSIONAL SKILLS

Network Operations: Cisco, Juniper, Nokia, CLI troubleshooting, IP service operations, Linux fundamentals, technical escalations

IT Service Management: ServiceNow, ITSM, operational reporting, incident coordination, SOP development, knowledge transfer

Software & Systems: C#, ASP.NET MVC, SQL, Entity Framework, HTML, CSS, Bootstrap, JavaScript fundamentals, Postman, API testing

Business & Leadership: Workflow analysis, requirements documentation, process improvement, team coordination, mentoring, technical training

PROFESSIONAL EXPERIENCE

Infosys Limited | June 2022 – Present

Infrastructure Associate | Lumen Network Operations — Technical Lead & SME
October 2025 – Present

- Lead daily Red/Blue IP disconnect operations, coordinating ticket assignments, monitoring workloads, providing technical guidance, and supporting team performance.
- Execute and troubleshoot production network disconnect workflows across Cisco, Juniper, and Nokia equipment using authorized CLI access, configuration history, and operational tools.
- Develop technical SOPs, troubleshooting references, and training materials to improve workflow consistency, onboarding, and team knowledge transfer.
- Investigate operational discrepancies, coordinate with technical teams on incomplete DDoS removals and service issues, and escalate unresolved problems to appropriate leadership.
- Maintain operational reporting, communicate workflow challenges, and support cross-training for Orange IP operations and related technologies.

L2 Customer Service Center — SME & Team Lead
Morgan Stanley Client Assignment | August 2024 – September 2025

- Provided Level 2 enterprise support for FTP/SFTP file transfers, PGP encryption key maintenance, credentials, and related technical issues.
- Investigated transmission failures using JSON-based reports and troubleshooting procedures, coordinating technical escalations and issue resolution.
- Authored **10 standardized operational and technical procedures** adopted as required team training and reference materials.
- Provided SME guidance, onboarding, and technical training to assigned and offshore personnel.
- Used ServiceNow for ticket management, operational reporting, service-level monitoring, and escalation coordination; collaborated with project managers to resolve workflow barriers.

ServiceNow & Enterprise IT Project Support
June 2022 – July 2024

- Supported enterprise IT projects involving ServiceNow, functional testing, technical documentation, and platform administration.
- Researched release changes during a multi-version ServiceNow upgrade and developed client-facing chatbot documentation and functional test scenarios.
- Configured workflows, application features, and service catalog elements in sandbox environments while completing structured ITSM and technology training.

EARLIER BUSINESS & OPERATIONS EXPERIENCE

Independent Trucking Operations Coordinator | 2013–2021

- Coordinated transportation logistics, appointment scheduling, hours-of-service considerations, routing, fuel management, and operational records.
- Analyzed load profitability, reconciled settlements, and developed Excel-based tracking systems for shipment history, facility information, and financial data.
- Identified workflow inefficiencies that informed the independent TruckerPay and Waypoint software projects.

Additional Professional Experience

Kelly Services — Substitute Teacher (2019–2021) | AIM Services — Direct Support Professional (2016–2017) | CRST — Commercial Truck Driver (2012–2013)

Small Business Ownership & Community Experience | 1990s–2004

Co-owned and operated a licensed recreational paintball business, managing vendors, scheduling, financial records, and attorney-reviewed liability documentation. Supported planning, safety procedures, marketing, and operations for a subsequent startup; independently operated a childcare service with responsibility for contracts, billing, and recordkeeping. Contributed to military-family operational security awareness communications as a volunteer.

SELECTED TECHNICAL & INDEPENDENT PROJECTS

TruckerPay | Individual Full-Stack Software Development Project
Independently designed and developed an ASP.NET MVC application using C#, SQL Server, Entity Framework, HTML, CSS, Bootstrap, and Razor views. Created relational database structures, business logic, and user interfaces; organized the solution into data, model, service, and web application layers. Used JavaScript libraries and Postman during development and API testing.

Waypoint | Trucking Operations Platform — In Development
Designing a business-focused software platform incorporating requirements analysis, user stories, business rules, data modeling, and workflow planning for trucking operations and financial tracking.

Additional Projects: Hero Academy — independently developed summer educational program; Family History Book — archival research, evidence evaluation, and long-form historical documentation.

EDUCATION

Associate's Degree in Business Administration and Management
American InterContinental University | GPA 3.8 | Dean's List

Software Development Bootcamp — Eleven Fifty Academy, 2021
ServiceNow Platform Apprenticeship — ApprenticeNow, 2021
